EDUCATION

National Open University of Nigeria — Bachelor Degree in Computer Science (JANUARY - 2022)

Relevant Coursework:

- Web Development and Design
- Data Structures and Algorithms
- Software Engineering Principles
- Database Management Systems
- Artificial Intelligence and Machine Learning

Achievements:

- Outstanding performance in programming & web development-related subjects.
- Functional enhancements as part of a team project on a full-stack web application including user authentication, real-time updates to data and responsive design.

EXPERIENCE

Egits, Oyo State, Nigeria — *Web Development (Internship)*

JANUARY, 2024 - PRESENT

- Had cross-collaboration with the core technology teams and other platform teams to ensure the balancing of cross-platform standards for best optimization.
- Utilized reactive programming frameworks like React, Netlify, and Flow to work on threads thus increasing the app's performance.
- Implemented Test Driven Development approach through unit, integration, UI, and end to end testing in order to find the bugs and make sure that stable version of applications was deployed.
- Implemented in-app messaging and push notifications via Firebase Cloud Messaging and Functions which had a positive impact on user engagement.

PROJECTS

Portfolio Website

- Created an individual website showcasing projects, skills, and work experience
- Technologies Used: callbacks, Javascript, HTML5, CSS3, Netlify.

Web Application for Evogym

- Built Evogym from the ground up, a fully customisable online platform with abilities to encourage sports enthusiasts and fighters can register exercise activities, perform fitness lessons and keep tabs on training advancement.
- Technologies Used: React, Redux, Firebase, and Tailwind CSS

Mobile-Responsive Website

- Developed a website with the capability to adjust to different screen sizes, a database of users, and allow visitors to add data to the page.
- Technologies Used: Vue.js, Vuex, firebase.

TECHNOLOGIES

Languages

- JavaScript
- Typescript
- HTML5
- CSS3
- SQL

Frameworks

- React JS
- Vue JS
- Tailwind CSS
- Redux
- Netlify

Tools / Technologies

- Git
- Vite
- Firebase
- Cloudinary

Database Management

- Firebase
- Firestore

Version Control

- Git
- GitHub

Project Management

- Team works & Cross-functional collaboration
- Software Development Lifecycle Management

Certifications

- Front-End Developer - Egits, 2022
- ALX Aice Certificate - ALX 2024
